DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, 50-52 in part, drawn to compounds pharmaceutical compositions and method of using these compounds, wherein X is a NR7, E is a pyridinyl, 1,4-dihydropyridinyl, 1,2-dihydropyridinyl, and L1 is a O, classified in class 546, 514, subclass 268.7, 272.7, 341, 342. A further election of a single disclosed species is required.
- II. Claim 1-16, 50-52 in part, drawn to compounds pharmaceutical compositions and method of using these compounds, wherein X is a NR7, E is a pyridinyl, 1,4-dihydropyridinyl, 1,2-dihydropyridinyl, and L1 is a CH2 classified in class 546, 514, subclass 268.7, 272.7, 341, 342. A further election of a single disclosed species is required.
- III. Claims 1-3, 17-49 50-52 in part, drawn to compounds, pharmaceutical compositions and methods of using these compounds, wherein E is a phenyl, X is NR7, L1 is an O, classified in class 548 and 514, and various subclasses. A further election of a disclosed species is required.
- IV. Claims 1-52 in part, drawn to compounds, pharmaceutical compositions and method of using these compounds not included in the above I-III groups. A further election of a single disclosed species is required. This group is subject to further restriction.

Art Unit: 1625

The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the compounds do not have a common core, and the bonding and properties are different.

is different from

. The compounds have only a phenyl ring common! The different substituents along with other substituents on them lend different geometric configuration and properties.

If applicant 's traverse on the grounds that the inventions are not patentably distinct, applicants should submit evidence or identify such evidence now of record showing the groups to be obvious variants or clearly admit on the record that this is the case. In either instance if the examiner finds one of the inventions unpatentable over the prior art , the evidence or admission may be used in a rejection under 35 USC 103 of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II-IV, restriction for examination purposes as indicated is proper.

An attempt was made to reach Mr. Gregory Steele on 7/2/2002 to request an oral election to the above restriction requirement, but was unable to reach him.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1625

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
